

TOPIC:
**Killing Cancer Without
Any Side-effects**

Cancer is today as common as a bad cold; and TCM plays an important role in this current medical field too. Scientific use of select natural chemical compounds (e.g. from herbs) are now FDA approved and used for treatment of all stages of solid cancer tumors. This technology shows significant advantage over current standard cancer care, such as chemotherapy, radiation, and surgery. Dr. Yu has pioneered this therapy, and will discuss its evolution and future goals.
